[illegible]

## Manufacturer Information

Manufacturer : Korchip Corporation

Location : KORCHIP B/D, 359, Manan-ro, Manan-gu, Anyang-si, Gyeonggi-do,  
KOREA

Tel. : +82-31-361-8000

Fax. : +82-31-361-8080

## 1. Scope

This specification applies to STARCAP(Electric Double Layer Capacitor), submitted to specified customer in cover page.

## 2. Part Number System

DMS 3R3 224 (Example)  
 ① ② ③

- ① Series Name : DMS
- ② Rated Voltage : 3.3VDC
- ③ Capacitance : 0.22 F (224 =  $22 \times 10^{+4}$  uF)

## 3. Photo

## 4. General Specifications

ITEMS	DMS3R3204	DMS3R3224	DMS3R3304
Rated Voltage	3.3 VDC	3.3 VDC	3.3 VDC
Operating Temp.	-10 ~ +60 ℃	-10 ~ +60 ℃	-10 ~ +60 ℃
Capacitance (F)	0.20 F	0.22 F	0.30 F
Capacitance Tolerance	-20 ~ 80 %	-20 ~ 80 %	-20 ~ 80 %
Equivalent Series Resistance (ESR)	Less than 200Ω	Less than 200Ω	Less than 200Ω
Leakage Current (LC, 30min.)	Less than 150μA	Less than 150μA	Less than 150μA

## 5. Cell Structure

## 6. Product Construction and Dimensions

Part No.	Dimensions (mm)		
	ØD	H	P
DMS3R3204	6.8	1.8	2.0
DMS3R3224	6.8	1.8	2.0
DMS3R3304	6.8	1.8	2.0

## 7. Reliability Specifications

Item		Specification		Test Condition													
Temperature Characteristics	Capacitance Change	Step 2	Within ± 30% of Initial Value	Measure electrical characteristics after exposing STARCAP Capacitor to each temperature atmosphere for one(1) hour													
	ESR		10Times or less than Initial Value														
	Capacitance Change	Step 4	Within ± 30% of Initial Value	<table><tr><td>Step</td><td>Temperature</td></tr><tr><td>1</td><td>20±2℃</td></tr><tr><td>2</td><td>-25±2℃</td></tr><tr><td>3</td><td>20±2℃</td></tr><tr><td>4</td><td>60±2℃</td></tr><tr><td>5</td><td>20±2℃</td></tr></table>		Step	Temperature	1	20±2℃	2	-25±2℃	3	20±2℃	4	60±2℃	5	20±2℃
	Step		Temperature														
	1	20±2℃															
	2	-25±2℃															
	3	20±2℃															
	4	60±2℃															
5	20±2℃																
ESR	200ohm or less																
LC(30min.)	4Times or less than Initial Value																
Capacitance Change	Step 5	Within ± 10% of Initial Value															
ESR Change		200ohm or less															
LC Change (30min.)		Within ± 10% of Initial Value															
Humidity Resistance	Capacitance Change	± 30% of Initial Value		Temp. : 40±2℃ Humidity : 90 ~ 95%RH Time : 500±8 Hours <b>No Voltage Applied</b>													
	ESR	1kohm or less															
	LC(30min.)	2Times or less than Spec. Value															
	Appearance	No Marked Defect															
Self Discharge Characteristics	Voltage	More than 2.0Vdc	Charging Condition	Voltage : 3.3Vdc Current : 20mA Charge Time : 24 Hours													
			Self Discharge Condition	Duration : 24 Hours Temp. : Less than 25℃ Humidity : Less than 70%RH													
Vibration Resistance	Capacitance	Spec. Value		Amplitude : 1.5mm Frequency : 10 ~ 55Hz Direction : X, Y, Z 3 Directions Test Time : 6 Hours													
	ESR	Spec. Value															
	LC(30min.)	Spec. Value															
	Appearance	No Marked Defect															
Terminal Strength	Appearance	Terminals shall not be separated	Load 1kg , 10±1 Sec.														
Terminal Bend Strength			Load 1kg , Angle 90° , 1Cycle														
Endurance	Capacitance Change	Within ± 30% of Initial Value		Temp. : 60±2℃ Test Time : 1,000(+24,-0) Hours Applied Voltage : 3.3Vdc													
	ESR	4kohm or less															
	LC(30min.)	Spec. Value															
	Appearance	No Marked Defect															
Cycle Characteristics	Capacitance Change	Within ± 30% of Initial Value		Temp. : 25±2℃ Cycle No. : 10,000 Charge Voltage : 3.3Vdc Resistance : 100Ω, Time : 9min. Discharge Resistance:100Ω, Time:1min.													
	ESR	4kohm or less															
	LC(30min.)	Spec. Value															
	Appearance	No Marked Defect															

## 8. Packing Specifications

Part No.	Quantity (PCS)			Size (W × L × H mm)		Weight (Kg)
	Vinyl Bag	Inner Box	Outer Box	Inner Box	Outer Box	
DMS3R3204(224, 304)	200	2,000	32,000	180×170×75	375×340×350	≈ 10

## 9. Labeling Standards

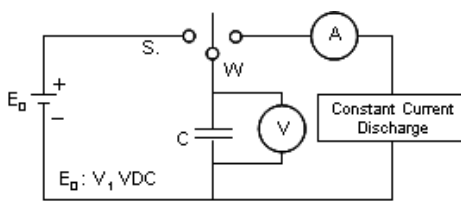

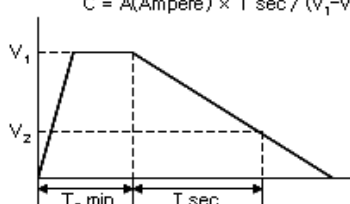

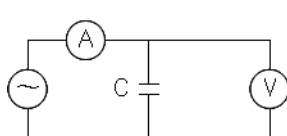

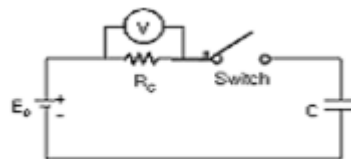

### Lot No. System

Ex.) S X A A C 002

① ② ③ ④ ⑤ ⑥

- ① Product Code : S (STARCAP)
- ② Production Year Code : X (2013), Y (2014), Z (2015)...
- ③ Factory Identification Code : A (Factory 1)
- ④ Production Month Code : A (Jan.), B (Feb.), ... , J (Oct.), K (Nov.), L (Dec.)
- ⑤ Production Date Code : 1 (1st), 2 (2nd), ... , 9 (9th), A (10th), B (11th), C (12th) ...  
Q (26th), R (27th), S (28th), ... , V (31th)
- ⑥ Lot Issuing Serial Code : 001 (First lot of a specific day), 002 (Second lot of a specific day), 003 (Third lot of a specific day)...

## 10. Measuring Method of Characteristics

Capacitance	<p>1) Charge the STARCAP with <math>1 \pm 0.1 \text{ mA}</math> to operation voltage of <math>V_1 (=2.6 \text{ V})</math> for 1 hour.</p> <p>2) Discharge the STARCAP with constant current(A) <math>0.1 \pm 0.01 \text{ mA}</math> to the voltage of <math>V_2 (=1.3 \text{ V})</math> while measure the discharge time(T).</p> <p>3) Calculate capacitors using the following formula.</p>  $C = A(\text{Ampere}) \times T \text{ sec} / (V_1 - V_2)V [\text{F}]$ 
Equivalent Series Resistance (ESR @1kHz)	<ul style="list-style-type: none"> <li>● Measure ESR by the LCR meter. (Frequency:1kHz, Bias Voltage : <math>0^{+0.05} \text{ V}</math>) or</li> <li>● Calculate ESR using the following formula.</li> </ul>  $R[\Omega] = V[V] / I[A] \quad * i[\text{mA}] = I[A] \times 10^{-3}$ <p><math>R</math> : Internal resistance(ESR) [<math>\Omega</math>]  <math>V</math> : Measured voltage between terminals [V]  <math>i</math> : Current 1mA(A.C.)</p> $\text{ESR}[\Omega] = V / i$
Leakage Current	<p>1) Apply <math>3.3 \pm 0.1 \text{ V}</math> to the STARCAP.(<math>E_0</math>)</p> <p>2) Measure <math>V_R</math> after <math>30 \pm 0.5 \text{ min}</math>.</p> <p>3) Calculate current using the following formula.</p>  $LC = (V_R / R_C) \times 10^3 [\text{mA}]$ <p><math>V_R</math> = Measured value  <math>R_C = 100 \Omega</math></p>
<p> The STARCAP should be shorted before each measurement as follows ;          Capacitance : 60 min. , ESR : 15 min. , LC : 15 min.</p>	

## 11. Mounting

When you solder STARCAP to a printed circuit board, excessive thermal stress could cause the STARCAP's electrical characteristics to deteriorate, compromise the integrity of the seal or cause the electrolyte to leak due to increased internal pressure.

### ① Recommended condition of flow soldering

If you want to set or mount DMS series STARCAP on a PCB with resin before soldering for ease of soldering process, follow the thermal condition below.

- Hardening Temp. of Resin : 80℃ or below
- Hardening Time of Resin : 10 min. or less

### ② Recommended condition of manual soldering

- Soldering Tip Temp. : 350℃ or less
- Soldering Time : 3 sec. or less
- Times : Three times or less at intervals of 9 sec. or more
- ※ Do not touch the metal case of STARCAP with a soldering iron.

### ③ It is not allowed to go through reflow (IR, Atmosphere heating methods etc.) process.

### ④ The terminals are plated for good solderability. Rasping terminals may damage the plating layer and degrade the solderability.

Do not apply a large force to the terminals. Otherwise, they may break or come off or the STARCAP characteristics may be deteriorated.

## 12. Cautions for Use

Please be careful for following points when you use STARCAP.

### 1) Do not apply more than rated voltage.

If you apply more than rated voltage, STARCAP's electrolyte will be decomposed and its ESR increase. At the worst, it may be broken.

### 2) Do not use STARCAP for ripple absorption.

### 3) Polarity

Please mount it in accordance with its polarity.

### 4) Operating temperature and life

Generally, STARCAP has a lower leakage current, longer back-up time and longer life in the low temperature i.e. the room temperature. But it has a higher leakage current, shorter back-up time and shorter life in the high temperature.

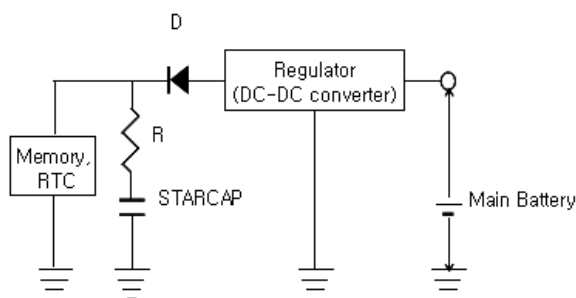

Please design to keep STARCAP away from calorific parts.

### 5) Cleaning

Some detergent or high temperature drying causes deterioration of STARCAP.

If you wash STARCAP, Consult us.

### 6) Following figure shows the general back-up circuit.

D : Diode to prevent the reverse current

R : Resistor to control the charging current

### 7) Short-circuit STARCAP

DO NOT short-circuit between terminals of STARCAP without resistor.

8) Storage

In long term storage, please store STARCAP in following condition;

- ① TEMP. : 15 ~ 35 °C
- ② HUMIDITY : 45 ~ 75 %RH
- ③ Non-dust, non-acidic and/or non-alkaline atmosphere
- ④ Avoid direct sun light, strong magnetic field

Storage period limit is one(1) year when a STARCAP is stored in the above condition. Storage in improper condition may cause some damage to STARCAP.

9) Do not disassemble STARCAP. It contains electrolyte.

10) Series connection of STARCAP

Over-rated voltage may be applied to a single STARCAP in series connection due to the deviation of capacitance and ESR of each STARCAP. Please inform us if you are using STARCAP in series connection and please design so as not to apply over-rated voltage to each STARCAP, and use STARCAPs from same lot.

11) The tips of STARCAP terminals are very sharp. Please handle with care.

### 13. Environmental Management

All STARCAP products are RoHS compliant and environment friendly.
